## Capabilities Statement

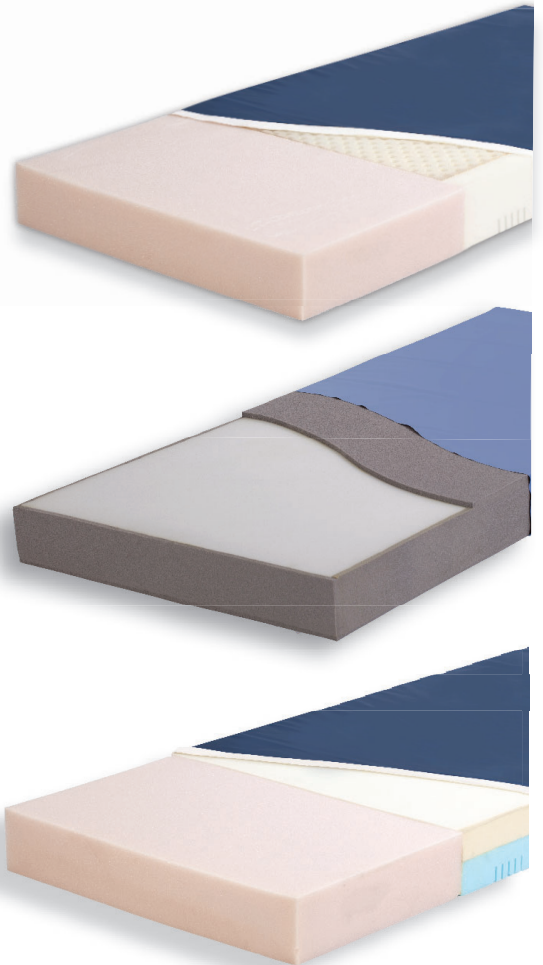

Since 1986, Chestnut Ridge Foam, Inc has offered a wide variety of healthcare mattress and foam products from our in-house manufacturing facility to support the needs of acute, long term, and behavioral care facilities.

Chestnut Ridge Foam, Inc is honored to become a GSA schedule holder under the VA Federal Supply Schedule (FSS) Schedule 65II A - Medical Equipment and Supplies under Federal Supply Contract 36F79719D0081.

Our healthcare mattresses are offered with various pressure reduction capabilities with a multitude of options: the Assurance® and Premier Collections.

For various group home settings, including rehabilitation centers and half-way houses, we offer our Nuvo Facility Mattress for comfort and durability.

EIN:	25-1530068
TIN:	25-1530068
GSA Schedule Contract:	36F79719D0081

## Long term / Acute Healthcare

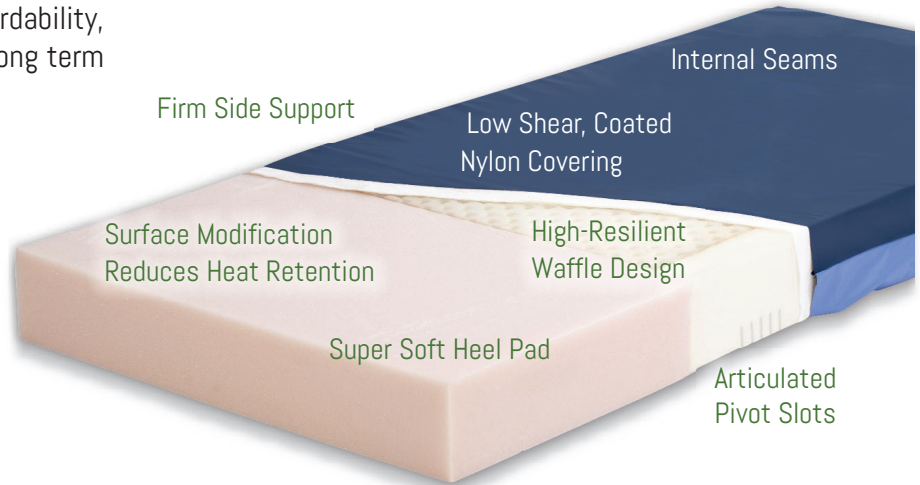

### Assurance™

The Assurance line was created with resident care in mind while conscious of many facility budgetary constraints. This high density, multi-layered foam with soft heel padding provides the utmost comfort and the necessary pressure reduction characteristics for your residents.

With its perfect blend of longevity and affordability, the Assurance is the perfect choice for long term care facilities.

#### ASSURANCE MODELS

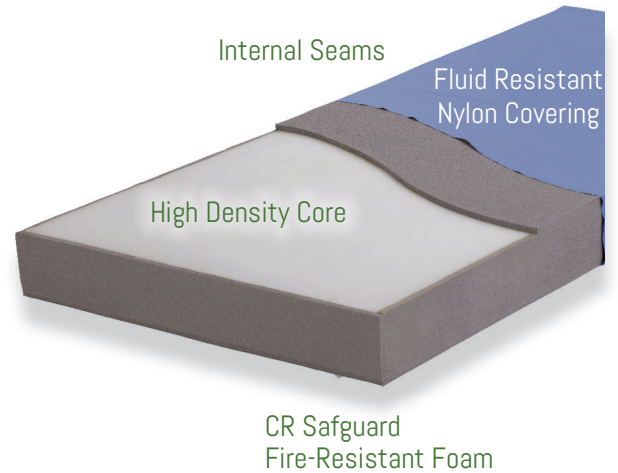

- FP- Firm Side Cushioning
- SS- Side Support for Passive Restraint
- SL- Sloped Heel Pad
- SR- Slow Recovery

## Behavioral Healthcare

### Premier

The Premier line provides a high level of safety while maintaining the needed comfort characteristics. Premier is manufactured with a higher density, solid foam core and wrapped with two options of fire protection: flexible fire barrier, or encapsulated with ½" of Safeguard® fire-resistant foam. The covering is a tighter vinyl cover with internal sewn seams. The only external seam is coated with a CVW film to prevent tampering.

## Facility Mattresses

### Nuvo®

Our Nuvo facility mattresses are designed specifically for use in various group lodging. The Nuvo is composed of high-density, full depth-foam that eliminates the metal springs which typically squeak, bend, or rust. The modern full depth foam concept also eliminates the eventual discomfort to the occupant due to "feeling the springs".
